

Pracownia Systemów i Urządzeń Sieciowych		
06.10.2022 - PSiUS - Windows Serwer 2019 -> Instalacja AD, Promowanie Serwera 06.10.2022 - Przyłączanie komputerów do domeny		
	Imię i Nazwisko	klasa/grupa/ rok szk.
	Ksawery Zelek Adrian Starostka	3TI 4/4

INTERFEJSY

ST - LAN1 - zintegrowany

LAN2 - na porcie PCIe

S - LAN - zintegrowany

WAN - na porcie PCIe

TREŚĆ ZADANIA

nazwisko.local

Użytkownik, który loguje się z domeny:

L: imienazwisko

H: ZAQ!2wsx

Zadanie do wykonania na lekcji. Po wykonaniu instrukcji z pdf !!!

Na kliencie ustaw nazwę komputera komp2 i przyłącz go do swojej domeny.

Sprawdź połączenie pomiędzy serwerem, a klientem "obustronnymi pingami".

Odłącz komputer od domeny i zmień jego nazwę na komp3 .

Zmień adres IP swojego serwera na 192.168.0.x , gdzie x jest numerem stanowiska:

stanowisko1 - adres .100, stanowisko2 - adres 102, stanowisko3 - adres 103 itd

Przyłącz komputer do swojej domeny jako administrator i sprawdź "pingami" połączenie.

Odłącz komputer od domeny i zmień jego nazwę na komp4

Utwórz na serwerze konto komputera w kontenerze `zst.local` i pozwól na przyłączanie go do domeny innemu użytkownikowi niż Administrator (np. `student1`)

Przyłącz komputer do domeny przez użytkownika do tego uprawnionego i sprawdź połączenie "pingami".

Ustaw użytkownikowi `student1` możliwość logowania do domeny poza czasem, w którym odbywają się zajęcia z przedmiotu PSiUS

Sprawdź czy można zalogować się z klienta tym użytkownikiem do domeny.

Temu samemu użytkownikowi ustaw logowanie do domeny w czasie, w którym odbywają się zajęcia z przedmiotu PSiUS i również sprawdź czy można zalogować się z klienta tym użytkownikiem do domeny.

Wszystkie czynności udokumentuj zrzutami z ekranu i umieść w swoim sprawozdaniu.

1. PINGI PO PODŁĄCZENIU URZĄDZEŃ
